

AASHIRVAD K VARGHESE

Data Analyst | MIS & Reporting | Business Analyst | Junior Data Scientist
+91 96564 71124 | aashirvadkv@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-oriented Data Analyst and aspiring Data Scientist with a B.Com in Accounts & Data Science. Proven experience in data collection, data cleaning, data validation, exploratory data analysis (EDA), statistical analysis, and MIS reporting. Skilled in Python (Pandas, NumPy, Scikit-learn), SQL, Tableau, data visualization, and end-to-end ML project delivery. Track record of identifying data anomalies, improving reporting accuracy, generating business insights, and building ML pipelines for fraud detection, NLP, and predictive analytics. Seeking entry-level Data Analyst, Business Analyst, Reporting Analyst, or Junior Data Scientist roles in India or UAE.

WORK EXPERIENCE

Project Management Consultant – Data & Reporting | *Arcite School of Data Science* Sep 2025 – Mar 2026

- Monitored ML project datasets end-to-end; performed data validation and anomaly detection, improving reporting accuracy and pipeline integrity.
- Conducted EDA, data cleaning, and statistical analysis on raw datasets to ensure data quality before model training and reporting.
- Generated structured MIS reports and documentation in MS Excel and MS Word; tracked KPIs and delivered business insights to stakeholders.
- Coordinated data collection, ingestion, and version control via GitHub to ensure on-time, accurate project delivery.

Banking Intern – Operations & Compliance | *Co-operative Bank Chathanoor* 2024

- Monitored daily transactions and flagged reconciliation errors in ledger records, improving data accuracy in financial reporting and documentation.
- Processed KYC documentation for 100+ accounts with zero compliance errors; supported loan processing under rotational shift operations.

Freelance ML & Data Science Projects | *Independent / Remote* 2026 – Present

- Developed and deployed 4 end-to-end ML solutions; applied EDA, statistical analysis, and feature engineering to drive model performance.
- Automated data pipelines with Python; built interactive data visualization dashboards via Streamlit and deployed APIs using Flask.

KEY PROJECTS

- Fraud Detection System** — Data cleaning & SMOTE for class imbalance; Logistic Regression & Random Forest; high-recall fraud classification with EDA-driven feature selection.
- Resume ATS Scoring System** — NLP pipeline using TF-IDF and cosine similarity; automated data analysis for resume-to-JD alignment scoring and business insights.
- Emergency Triage Prediction** — Multi-class classification with statistical analysis; predicts patient severity for real-time clinical triage decision support.
- Salary Prediction System** — Linear & Random Forest regression; data visualization of compensation trends across experience, education, and role with high R^2 accuracy.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL

Analytics & Visualization: Tableau, Data Visualization, Exploratory Data Analysis (EDA), Statistical Analysis, Spreadsheet Analysis, MS Excel (Pivot Tables, VLOOKUP, Charts)

Data Process & QA: Data Collection, Data Cleaning, Data Validation, Data Preparation, Feature Engineering, SMOTE, NLP

Reporting & MIS: MIS Reporting, Business Insights, Documentation, Stakeholder Communication, Data-Driven Decision Making, Streamlit, Flask

Tools & Platforms: GitHub, VS Code, Jupyter Notebook, MS Word

EDUCATION

Bachelor of Commerce (Accounts & Data Science)

2022 – 2025

St. John's College, Anchal, Kerala, India

Result Awaited – One Paper Pending

CERTIFICATIONS

- Google Data Analytics Professional Certificate** — Google / Coursera | 2026
Skills: Data Collection • Data Cleaning • Data Analysis • SQL • Tableau • Data Visualization • Spreadsheet Analysis • Data Preparation • Data Reporting • Data Ethics • Stakeholder Communication • Data-Driven Decision Making
- IBM Data Science Professional Certificate** — IBM / Coursera | 2026
Skills: Python • SQL • Data Analysis • EDA • Statistical Analysis • Data Visualization • Machine Learning • Data Collection • Documentation • Business Insights
- Google AI Essentials** — Google / Coursera | May 2026
Topics: Intro to AI • AI Productivity Tools • Prompt Engineering • Responsible AI • AI Trends
- ITS Python** — Certiport, Pearson VUE
